

## WC AND URINAL SANITIZING

Neutralle Auto Sanitizer system provides the most effective automatic hygiene system that maintains clean, sanitized and odour-free toilets and urinals 24 hours a day. It reduces the build-up of organic and inorganic deposits on WC's and urinals which lead to malodours, blockages and lower levels of hygiene. Every time the toilet is flushed, tiny droplets of water spray up from the bowl and land on the toilet seat and other washroom surfaces. The problems of urinal smells and blockages are all too common causing embarrassment for staff and visitors alike.

## FEATURES & BENEFITS

- Reduces uric salt and limescale build-up
- Continuous dosing prevents bacterial growth and reduces the risk of cross infection
- Effective odour control for pipes, fixtures and traps
- Wall-mounted and connected directly into the tank
- Bio-formulation has the highest concentration of uric scale eating bacteria
- Available in white, bright chrome and satin chrome

## DIMENSIONS

Height: 134mm

Width: 70mm

Depth: 64mm
